

## **Dr Mel Wood**

***Aspiring Leaders Fellow – Sustainability***

***Cohort 4 2023/24***

***Harbury Surgery, Harbury***

Currently a GP Partner at Harbury Surgery in South Warwickshire, I have been a GP for 8 years and worked for the NHS for 15 years. Alongside being a partner, I have been the first Clinical Director for the Warwickshire East PCN and have worked with the SWGP Federation.

Prior to this I have worked for several years in both large and small pharmaceutical companies, mainly working on projects that had a direct healthcare benefit. My interests lie in sustainable healthcare, both in an environmental capacity but also from a workforce, particularly General Practice, point of view.

My aspirations are to use this fellowship to take the opportunity to explore what is already happening in Secondary Care and third sector organisations with regards to sustainability, and contribute towards their successes, but also to take some of those ideas to translate them into Primary Care.
