

# CWTH Road Map Supervisor Bank

The Coventry and Warwickshire Training Hub and Lantum are pleased to announce an exciting project for all **First Contact Practitioners** (FCPs) and First Contact Practitioner Road Map Supervisors (RMSVs) in the Coventry and Warwickshire and Hereford and Worcester regions.

This CWTH project offers RMSVs a **£50 per hour** payment for offering supervision to FCPs.

## **Can all Roadmap supervisors apply for the scheme?**

Anyone who has completed a Roadmap Supervisor course and is able to provide evidence of course completion (email/certificate/HEE register) can apply to be a Lantum registered RMSV. Any recognised RMSV can register with Lantum through this link:

<https://lantum.com/account/locum/signup>

## **Which FCPs can apply for a RMSV?**

Any FCP who is employed in the **Coventry and Warwickshire or Hereford and Worcester region** is able to apply for a RMSV. Even if you are employed by an acute trust or a private provider, if you require supervision to move through the FCP Roadmap, this provision is open to you.

## **How does the process work?**

A FCP who meets the above pre-requisites and who requires a RMSV can ask their GP practice to offer RMSV shifts (FCP supervisor shifts) on Lantum. These shifts are typically 1 hour in length, though can be offered at varying time lengths depending upon the FCP and RMSVs requirements. These shifts will be advertised on the Lantum website/app.

Any RMSV who is registered with Lantum (**[register here](#)**) will be able to view the shifts and apply for them through the Lantum system and their personal roster. Once the FCP and RMSV have met and the RMSV has completed the shift, the RMSV will be paid directly through Lantum into their personal bank account.

## **How does an FCP apply for a RMSV?**

A FCP can apply for a RMSV through their GP practice - who can offer RMSV shifts through their Lantum roster.

## **Can any RMSV supervise any FCP?**

**Yes**, any RMSV can supervise any FCP and sign off all aspects of the FCPs portfolio. However, if evidence is used in the portfolio that falls outside the scope of practice of the RMSV - this would have to be assessed and signed off by a RMSV who works within that area of practice. For example, a Paramedic assessing a patient with regard to angina may be out of the scope of practice of an RMSV who is an Occupational Therapist.

RMSVs can access the [Roadmap Supervisor training](#) offered by the Training Hub, which outlines the requirements of supervision and is held quarterly.

## **How does an FCP apply for a RMSV?**

RMSVs will need to register with Lantum (**please see the PDF at the end of this document**). Supervisory shifts will be advertised through the Lantum portal (**sign in here** - <https://lantum.com/account/locum/signup>).

Once the RMSV is registered on Lantum, they will be able to apply for supervisor shifts through the portal. This can be accessed online via the [Lantum website](#) or app.

**How much will the RMSV be paid and is there an hourly limit per supervisee?**

There is a **£50 hourly rate for supervision**. Typical shift lengths are one hour, though shift length can be tailored to meet FCP requirements.

There is a limit of 20 hours per supervisee which the Training Hub have determined an appropriate amount of time to enable the majority of FCPs to progress through stages one and two of their roadmap, with the help of the RMSV.
